Career Objective

CSE undergraduate (Big Data Analytics) at SRMIST with hands-on experience in **client-facing technical roles, REST API integration, full-stack development, and cross-functional collaboration**. Proven ability to **onboard users, debug issues, write technical documentation, and analyze product usage data** across multiple internships. Comfortable with **SQL, APIs, and basic debugging**; experienced delivering **live product demos and solution walkthroughs** to stakeholders. Seeking the **Technical Account Manager Intern role at Xeno** to drive client success on an AI-powered CRM and retail engagement platform.

Education

SRM Institute of Science and Technology (SRMIST) **2023 – 2027**
B.Tech – Computer Science and Engineering (Big Data Analytics) *CGPA: 8.79 / 10*

Technical Skills

Languages:	Python, JavaScript, SQL, C++
APIs & Tools:	REST APIs, FastAPI, Node.js, Express.js, Postman, root-cause debugging, basic API integration
Data & CRM:	MongoDB, PostgreSQL, MySQL, Excel / data analysis, product usage analytics, Agile sprint workflows
Cloud & Dev:	AWS, Docker, GitHub, VS Code, Google Colab, Kaggle
Soft Skills:	Client Communication, Cross-functional Collaboration, Technical Documentation, Problem Solving, Time Management

Internship Experience

Centre for Development of Advanced Computing (CDAC) **Feb 2026 – Mar 2026**
Research Intern – Cloud Infrastructure

- Researched **OpenStack** cloud infrastructure (Nova, Neutron, Cinder, Keystone); built foundational **product knowledge** of API-driven orchestration addressing enterprise use cases.
- Conducted **competitive analysis** of configuration approaches; authored **solution briefs and technical reports** delivering actionable recommendations to leadership.

NLC India Limited **Jun 2025 – Jul 2025**
Software Engineer Intern

- Developed a House Allotment System in .NET with **PostgreSQL**; wrote SQL queries to **validate data against business requirements** and delivered the solution to stakeholders.
- Authored end-to-end **technical documentation** covering system architecture, test scenarios, and deployment – collaborating with **cross-functional stakeholders** following Agile practices.

Projects

Retail Location Viability BI System – Multi-Agent AI Application
Python, FastAPI, Streamlit, PostgreSQL, Gemini API, Docker, Plotly

- Built an agentic AI app with 6 specialized agents for retail location scoring; created **interactive dashboards** (Plotly/Streamlit) to surface AI-generated insights for strategic decisions – directly analogous to **analyzing client data and product usage** in a TAM role.
- Translated complex AI outputs into **executive-level recommendations**; practiced communicating technical findings clearly to non-technical stakeholders.

Blood Bank Management System – Full-Stack Web Application
React.js, Node.js, Express.js, MongoDB, REST APIs, Geolocation API

- Designed and developed a full-stack platform end-to-end with role-based dashboards, donor management, and inventory tracking; delivered **technical demo walkthroughs** covering API design and key product capabilities.

MediBot – RAG-based Medical Chatbot
Python, Flask, LangChain, Pinecone VectorDB, OpenAI API

- Built a retrieval-augmented chatbot integrating **third-party AI APIs**; demonstrates hands-on experience **troubleshooting pipeline issues** and maintaining a live-service AI application.

Research & Publications

IEEE Conference Paper – AIEI 2026 (Published): “Unified Multilingual Hope Speech Classification for Thanglish, Manglish and English” – published at **IEEE AIEI 2026** (Advances in AI & Emerging Innovations, Jharkhand). ieeexplore.ieee.org/document/11497392. Contributed across **problem formulation, NLP model implementation, experimental evaluation, and manuscript preparation**.

Hackathons & Awards

Project Expo – 1st Prize: Led development and **live demo** of a Language Proficiency Assessment App; defined user personas, scoped features, and **delivered a hands-on product demo to a senior evaluator panel**.
Layers 4.0 – 3rd Place (Internal Hackathon) | **Altruisty Hackathon – 3rd Place**

Certifications

Red Hat Certified System Administrator (RHCSA) <i>Red Hat – credly.com/badges/4d36b5e8</i>	<i>Mar 2026</i>
Introduction to Machine Learning <i>NPTEL – IIT Madras</i>	<i>2025</i>
Introduction to Database Systems <i>NPTEL</i>	<i>2025</i>
CS50x: Introduction to Computer Science <i>Harvard University (edX)</i>	<i>2024</i>

Additional Information

B.Tech (CSE – Big Data Analytics) at SRMIST, graduating **May 2027**; CGPA **8.79 / 10**. Published IEEE researcher in multilingual NLP. Strong foundation in **API integration, client-facing technical support, cross-functional documentation, and full-stack development**. Available for the **1-year hybrid internship from Delhi**; open to **PPO conversion** based on performance.
